

Trusted global capabilities for pharma logistics

SWISSPORT
PHARMA[®] CENTER

Engineered for trust, designed to grow with you

Since 2015, Swissport has built a connected network of Pharma Centers that operate to the same standards across every location—removing variability from temperature-sensitive pharmaceutical logistics. Swissport Pharma Centers combine temperature controlled warehousing with standardized processes and qualified personnel. Facilities in Miami, Brussels, Basel, and Nairobi offer advanced end-to-end cooling with real-time monitoring.

579,554 tons
of pharmaceuticals handled in 2025

64,600 m²
temperature controlled space available

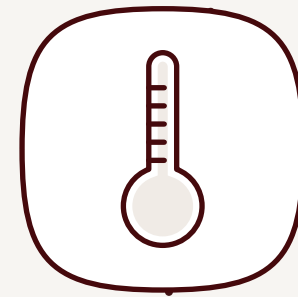

127% pharma tonnage growth since 2018

10/10 of the largest pharmaceutical companies trust Swissport to handle their cargo

*Figures correct as of 31 December 2025.

Temperature controlled facilities

Today, 91 of our 126 global air cargo centers are equipped to handle pharmaceutical goods, ensuring the safe and efficient transport of temperature-sensitive shipments through specialized infrastructure, strict compliance, and advanced technology.

Together, they form an integrated pharma network, enabling consistent temperature control, reliable documentation, and fast, seamless transfers.

15-25°C

41,082 m² available
147,342 t handled

2-8°C

21,249 m² available
426,826 t handled

-20°C

2,269 m² available
5,386 t handled

Digitization & innovation

- ✓ Swissport's pharma capabilities are standardized and published on the Validaide platform to allow lane risk assessment and supplier qualification.
- ✓ Our Cargo Portal provides live data on shipments, flights, storage, and individual ULDs, offering enhanced visibility and control.
- ✓ Our advanced technology enhances shipment integrity, streamlining inspections and ensuring compliance throughout the supply chain.
- ✓ Solutions like Cool+Connect optimize Active Container Loading in a seamless environment, reducing handling time and CO₂ emissions by up to 70%, shortening lead times by up to 3 hours, and cutting airport trucking costs by up to 50%.

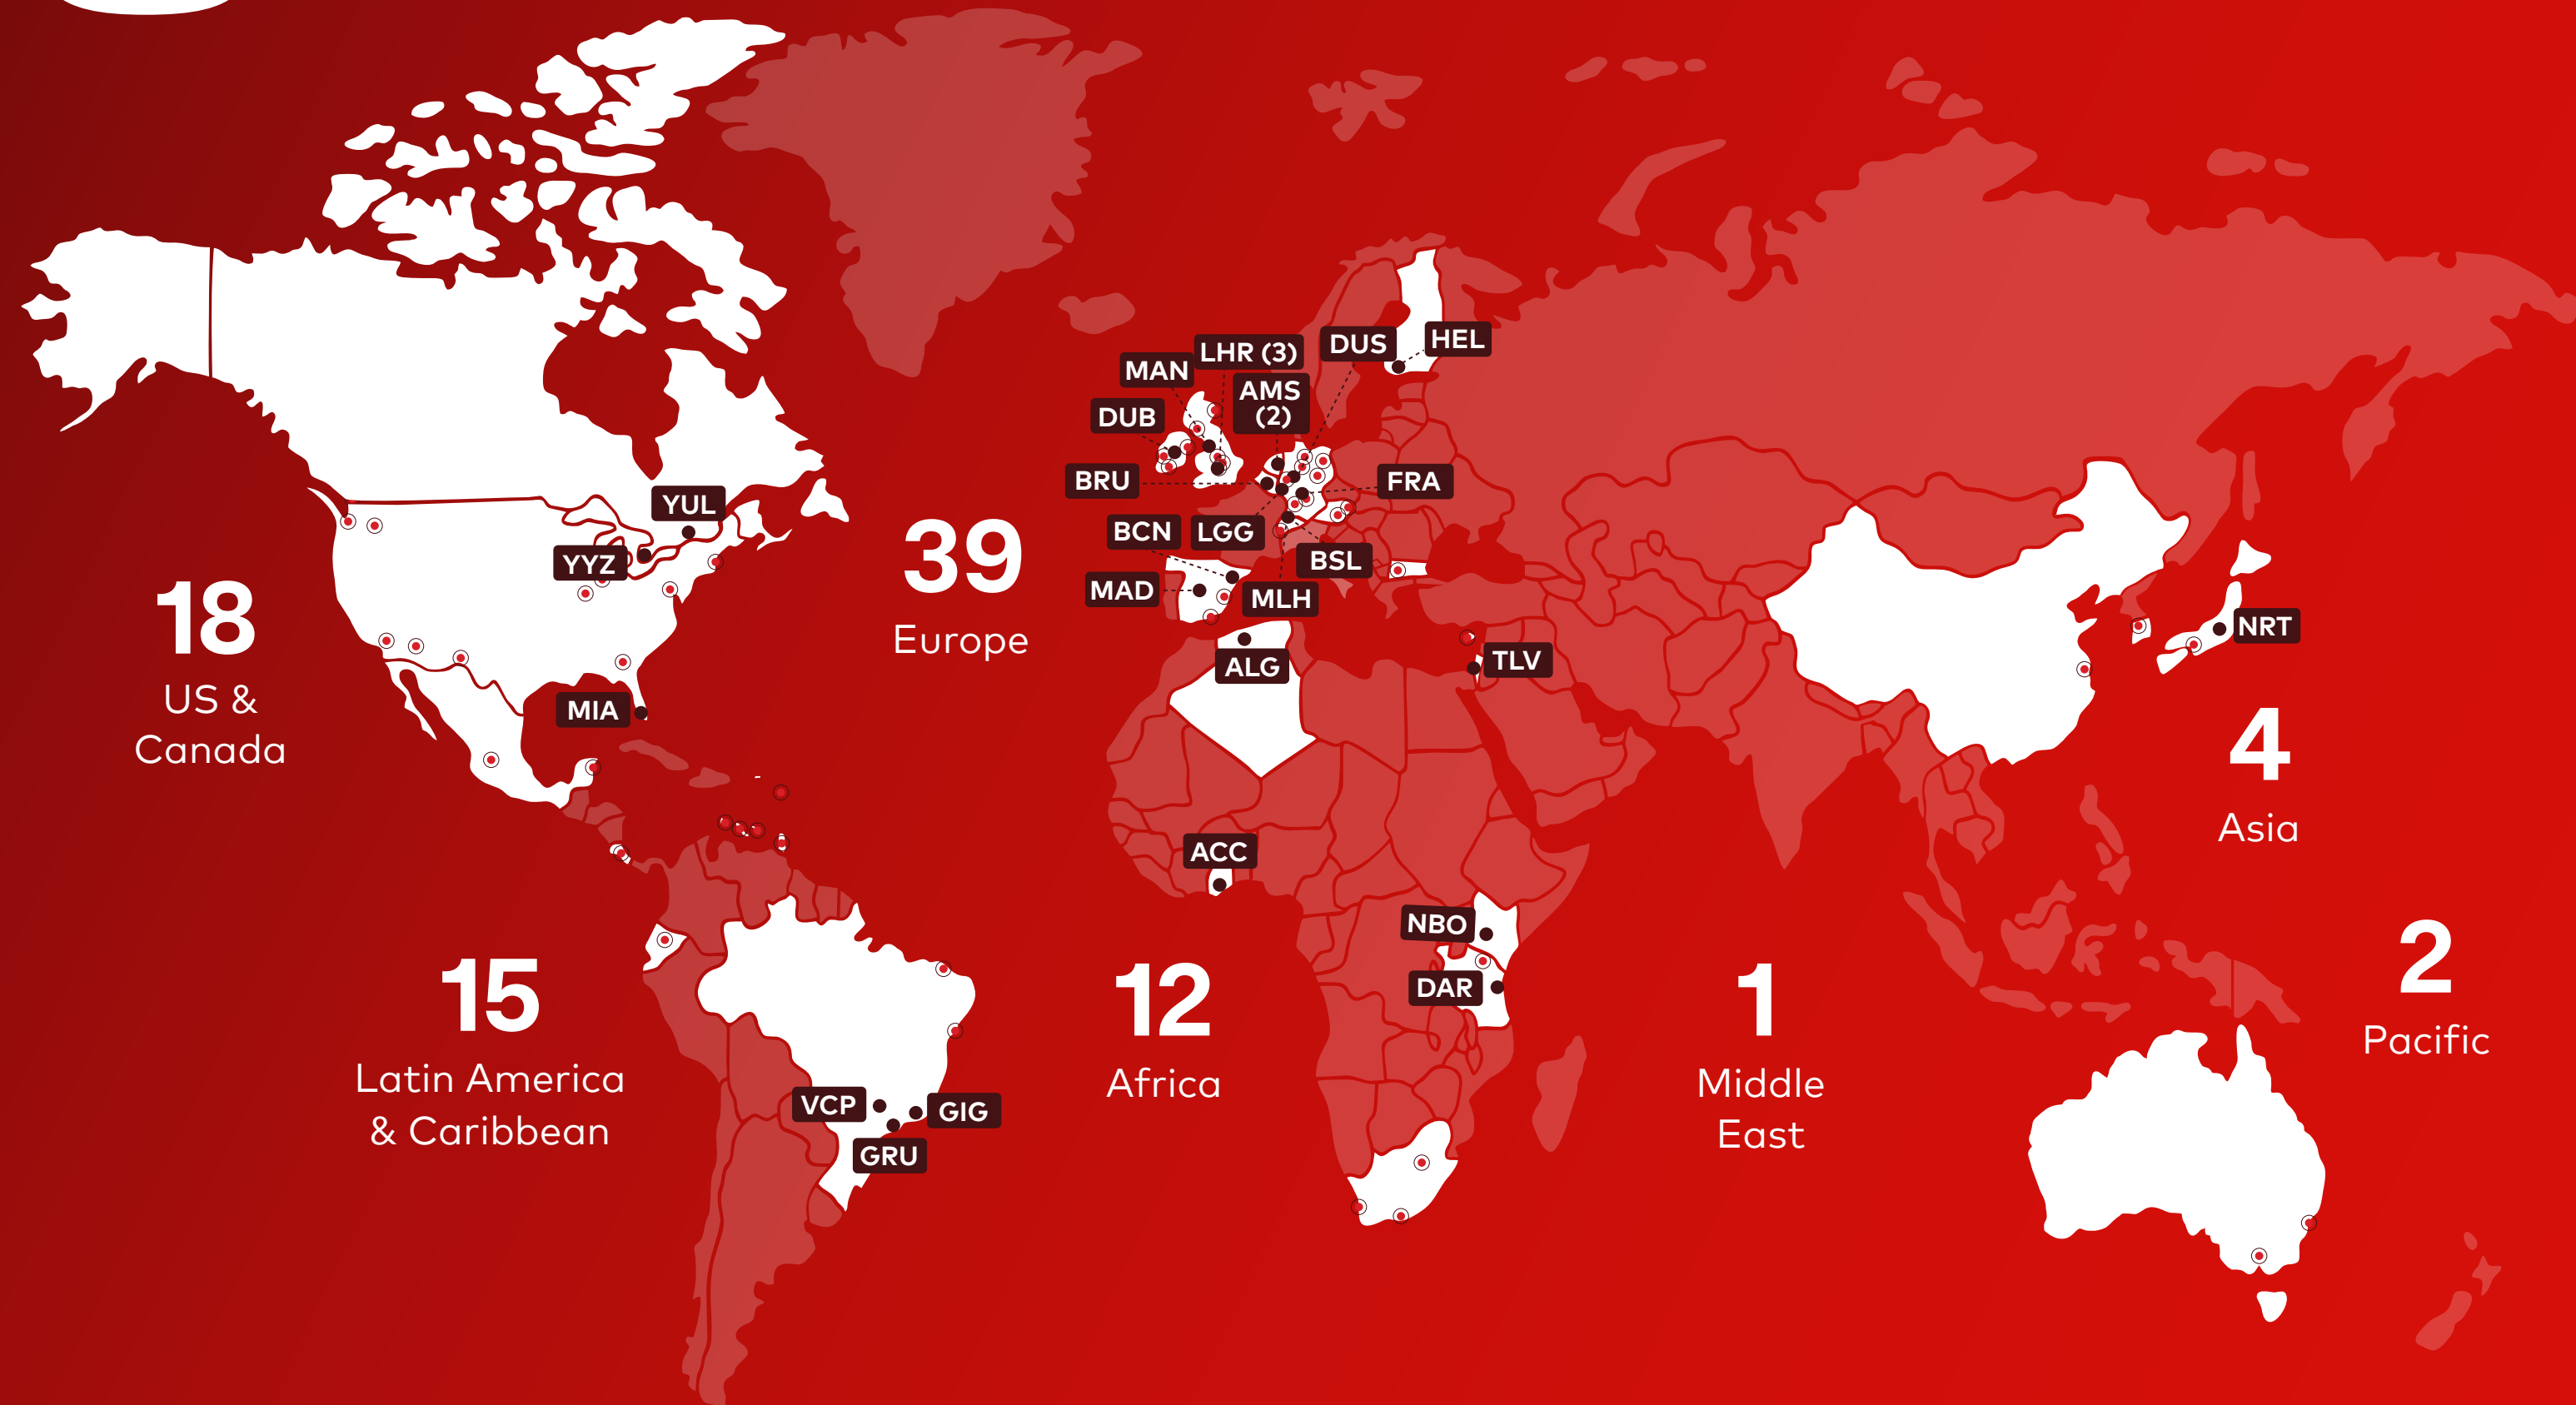

End-to-end cooling solutions

- 1 Specialized cooling containers ensure temperature controlled transport on the apron and during loading.
- 2 Pharmaceuticals are on- and offloaded at specialized cooled truck docks.
- 3 Temperature controlled and dedicated warehousing ensures sensitive cargo remains within the required temperature range at all times.

Our global pharma network

- **28 pharma centers**
certified through IATA, CEIV, MHRA, GDP, or Swissports own rigorous internal audits
- **63 additional pharma capable warehouses**
supporting flexibility and geographic coverage

*Figures correct as of
31 December 2025

28 of these locations have been certified by the IATA Center of Excellence for Independent Validators in Pharma Logistics (CEIV Pharma), the British Medicines and Healthcare Products Regulatory Agency (MHRA), comply with Good Distribution Practice (GDP), or meet our own stringent internal auditing requirements.

We actively contribute to the future of pharmaceutical logistics by participating in industry associations and helping shape standards, including through our board membership at Pharma.Aero.
